EGE BİLECEN

Mechatronics Engineer & Fullstack Developer

I specialize in software development of Mechatronics. I have done a variety of work in various fields using various programming languages. Because of this, I am quite quick to adapt to new projects and new programming languages.

EDUCATION

Bachelor of Mechatronics Engineering

Erciyes University (2017 - 2022), Kayseri/Turkey

- **GPA:** 3.13 / 4.00
- The Department of Mechatronics Engineering has awarded me with a Certificate of Appreciation for our group's success in the unmanned ground vehicle competition.

LANGUAGES

- Turkish (Native)
- English (Level B2)
- Japanese (Beginner Level)

WORK EXPERIENCE

Freelancer at Bionluk

October 2018 - October 2022, Turkey

Throughout my freelance work period, I completed/performed the following applications/works:

- 32 Data Mining Application
- 1 C++ ImGui Application
- 1 Python Application
- 4 Windows Forms Application using C#
- 4 PHP Based User / Admin Panel
- 1 PSD to HTML/CSS Conversion
- 2 Google Chrome Extension

Bionluk.com is the leading freelancer platform in Turkey. I wasn't doing very active freelance work throughout this period since I was also studying at university. I was just taking a job whenever I wanted some extra money.

PROJECT EXPERIENCE

Unmanned Ground Vehicle

February 2019 - May 2020, Kayseri/Turkey

I took part in the software team of an unmanned ground vehicle (UGV) project that a group of students were working on from February 2019 to May 2020. The ground station and UGV's communication, as well as the features for movement and control and image processing, were all written by me. Additionally, since Jetson NANO was being used as the primary controller for this project, I had the opportunity to work with it.

Unmanned Aerial Vehicle (Drone), Electrical Vehicle (car), Rocket and Model Satellite

2020 - Model Satellite and Unmanned Aerial Vehicle (Drone), Kayseri/Turkey

This year, I was the sole member of the software team of ERU Project Lab, a group of students from my university who came together to compete in the TURKSAT Model Satellite competition and the TEKNOFEST Internetional Unmanned Aerial Vehicle Competition. I worked on the Model Satellite's telemetry software, as well as the Unmanned Aerial Vehicle's autonomous control and image processing software. All of the code I wrote for these two projects can be found at the link below.

2021 - Electrical Vehicle, Rocket and Unmanned Aerial Vehicle (Drone), Kayseri/Turkey

This year, I was a member of the software team as the leader of the ERU Quantum Team, a group of students from my university who came together to compete in the TEKNOFEST Efficiency Challenge Electrical Vehicle, TEKNOFEST Middle Altitude Rocket, and TEKNOFEST Internetional Unmanned Aerial Vehicle Competition. I worked on the communication between ground control station and vehicle, screen display design and telemetry software for the electrical vehicle, ground control station and telemetry software for the rocket, and autonomous control of the unmanned aerial vehicle.

7.CERTIFICATION OF THE SUPPLEMENT

7.1 Date	7.2 Name and signature	7.4 Official stamp or seal
14.10.2022	Mustafa TOPAKTAŞ	

7.3 Capacity: Registrar`s Office, Registrar

Diploma Supplement can be verified using the URL https://turkiye.gov.tr/ebd?eK=5450&eD=BSRAPAU0B9&eS=16183(Pin: 37752).
This Diploma supplement is signed using secure e-sign according to article 5 of Law No 5070 on Electronic Sign. The image of the signature is used instead of original signature.

8.INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The Basic Structure of the Turkish National Education System consists of four main stages as pre-school education, primary education, secondary education and higher education.

Pre-school education consists of non-compulsory programmes whereas primary education is a compulsory 8 year programme for all children beginning from the age of 6. The secondary education system includes "General High Schools" and "Vocational and Technical High Schools".

Higher Education is defined as all post-secondary programmes with a duration of at least two years. The system consists of universities (state and non-profit foundation) and other types of higher education institutions (police and military academies and foundation vocational schools). Each university consists of faculties and schools offering First Cycle (Bachelor's level) programmes (240 ECTS), two year vocational higher schools offering Short Cycle (Associate's level) programmes (120 ECTS) of a strictly vocational nature and also graduate schools administering graduate programmes.

The Higher Education Law No. 2547 is the main law, which governs the higher education in Turkey. All universities (both state and non-profit foundation) are subject to the same law and regulations/rules. All state and non-profit foundation universities are founded by Law. The Higher Education System is regulated by the Council of Higher Education (Yüksek Öğretim Kurulu-YÖK) established in 1981, the Council regulates the activities of higher education institutions with respect to research, governing, planning and organization.

Admission to higher education is based on a nation-wide Student Selection and Placement Examinations (YGS and LYS). The examinations are held once a year and are administered by the Student Selection and Placement Center (ÖSYM), which is affiliated to the Council of Higher Education. Candidates gain access to institutions of higher education based on their composite scores consisting of the scores on the selection examinations and their high school grade point averages.

Graduate level of study consists of the Second Cycle (Master's Degree) and the Third Cycle (PhD/Doctorate Degree) programmes. There are two types of Master's programmes: with or without a thesis. The Master's programmes with a thesis have 120 ECTS and consist of a minimum of seven courses, with a minimum of 21 national credits*, one seminar course, and a thesis. The seminar course and thesis are non-credit and graded on a pass/fail basis. The duration of the Master's programmes with a thesis is four semesters. Non-thesis Master's programmes have 90 ECTS and consist of a minimum of 10 courses with a minimum of 30 national credits and a non-credit semester project. The semester project is graded on a pass/fail basis. Duration of the non-thesis Master's programmes is three semesters. PhD programmes have 240 ECTS and duration of eight semesters which consists of completion of a minimum of seven courses, with a minimum of 21 national credits, passing a qualifying examination, preparing and defending a doctoral dissertation. Specialization in Medicine accepted as equivalent to third cycle programmes are carried out within the faculties of medicine, university hospitals and the training hospitals owned by the Ministry of Health.

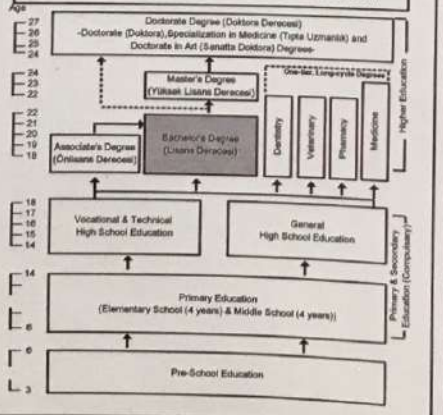
Since 2003, a change in the 1996 Regulations on Graduate Education allows Bachelor's degree holders to PhD programmes if their performance at the Bachelor's degree level is exceptionally high and their application is approved. For these students, the theoretical part of the PhD programmes consists of a minimum of 14 courses, with a minimum of 42 national credits.

* The national credit system is based on contact hours (i.e. theoretical or practical hours per week). 1.0 credit stands for each hour of lecture a week and 0.5 credit stands for each hour of laboratory or practical a week.

TYYC LEVELS QUALIFICATIONS TYPES AND ECTS CREDITS

Higher Education Levels/Cycles			AWARDS/ DEGREES	LENGTH	TOTAL ECTS CREDITS	TOTAL STUDENT WORKLOAD (h)
QF-EHEA	EQF-LLL	TYYÇ LEVELS		(Year)	(Year x 60 ECTS)	(1 ECTS=25-30h)
3	8	8	Doctorate Specialization in Medicine Doctorate in Art	3 (min.)	180 (min.)	4.500-5.400
2	7	7	Master's Degree	1 - 2	60 - 120	1.500 - 3.600
1	6	6	Bachelor's Degree	4	240	6.000 - 7.200
Short Cycle	5	5	Associate's Degree	2	120	3.000 - 3.600

GENERAL STRUCTURE OF THE TURKISH EDUCATION SYSTEM



DIPLOMA SUPPLEMENT

ERCİYES ÜNİVERSİTESİ 1978

Diploma Date: 14.10.2022

Diploma No: 23424

This Diploma Supplement follows the model developed by the European Commission, Council of European and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international "transparency" and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, context, content and the status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

Extra - long life paper.
Printed with high technology against counterfeiting and/or tampering.

1.INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1. Family name(s)	1.2. Given name(s)
BİLECEN	EGE
1.3. Date of birth	**1.4. Student identification number**
12.09.1999	1031111515

2.INFORMATION IDENTIFYING THE QUALIFICATION

2.1. Name of the qualification	2.2. Main field(s) of study for the qualification
Mekatronik Mühendisliği, Lisans	MECHATRONIC ENGINEERING

2.3. Name and status of awarding institution: Erciyes Üniversitesi, Devlet Üniversitesi
Erciyes University, State University

2.4. Name and status of institution administering studies	2.5. Language(s) of instruction/examination
Same as 2.3	Turkish

3.INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1. Level of qualification: First Cycle (Bachelor's Degree)

3.2. Official length of programme: 4 years (240 ECTS credits)
2 semesters per year, 14 weeks per semester excluding exams

3.3. Access requirement(s): High School Diploma
Student Selection and Placement Examination for Higher Education

4.INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1. Mode of study: Full-time

4.2. Programme requirements

A student is required to have a minimum CGPA of 2.00/4.00 and no failing grades

Objectives

•To provide the students the essence of electrical (including optics), electronics, mechanical and computer engineering disciplines in a meaningful package,

•To make them use all the technological disciplines to build intelligent electromechanical systems or communicate with experts in each area to design a product.

•To introduce the student to complicated design and application problems in a lab environment by the use of Computer Aided Design (CAD) tools for real-world engineeering problems.

4.3. Programme details: (e.g. modules or units studied), and the individual grades/marks/credits obtained

4.4. Grading scheme and grades

For each course taken student is given one of the following grades by the course teacher. The letter grades, grade points and percentage equivalents are given below:

Grade	Coefficient	Qualification
AA	4.00	EXCELLENT
BA	3.50	VERY GOOD
BB	3.00	GOOD
CB	2.50	SATISFACTORY
CC	2.00	SUFFICIENT
DC	1.50	FAIR
DD	1.00	PASS

The grade **(ST)** is given to courses accepted as equivalents in transfers from other universities or to the students who registered at Erciyes University again with the **ÖSYM** (Student Selection and Placement Center) exam based on the decision concerning the courses accepted as equivalents of the previously taken courses. The **(ST)** grade is not included in computing the grand point average **(GPA)** but is shown on the transcript.
The grade **(GT)** is given to the students who are successful in the courses of which grades are not included in computing the grand point average **(GPA)**. If those conditions are satisfied, Curve System is employed.
The grade **(ET)** is given to the students who are found successful in the examination for exemption conducted by the department concerned for courses determined by the University Senate. The **(ET)** grade is not included in computing the grand point average but is shown on the transcript.

4.5. Overall classification of the qualification

Cumulative GPA: 3.13/4

5.INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1. Access to further study

May Apply to Second Cycle Degree Programmes

5.2. Professional status conferred

The degree enabled to exercise the profession
